

MEMO

To: ALL CLNB Families & Staff

From: Sherry Carnevale

Subject: Stage One Re-opening Plans

As a follow up from our last memo:

In addition to outdoor visits being allowed with the following precautions,

- outdoors,
- by appointment only,
- supervised by staff,
- social distanced only
- masks and goggle/ visors mandatory

HUGS will now be allowed. Families will be able to have “brief” contact with their loved one.

Short visits outside the residences are also permitted as of today. All of the safety precautions should still remain in place for those visits.

Outside recreational activities are also now allowed but must follow the outdoor gathering limits. We are very aware that many of the activities that people will want to participate in will not be available to them yet, but at least it is a start. We will also need to also respect the rules of the establishments we attend. Many of our people are not able to wear masks so we will need to navigate those waters carefully.

We are also in the process of setting up another vaccine clinic. We have obtained some appointments at local pharmacies but the availability of the different vaccines hinders that process. We will keep you posted.

We sincerely appreciate your support and your patience,
